Overview

The affiliation process allows a group or organization to bill and receive payments on behalf of an individual/rendering provider In NCTracks system, the affiliation is managed by the Individual providers using the Manage Change Request process. This guide provides step-by-step instructions for affiliating an individual provider record to a organization/group provider record in NCTracks.

Certain types of changes will route the application to CSC for review and approval. For example, adding taxonomy will require credentialing. Adding a new managing employee requires that a background investigation be completed.

The provider affiliation process is an automatic process that will NOT route the application to CSC as long as no other changes are made to the application.
